

LINKED SERIES

INSTALLATION GUIDE

WARNING!

ELECTRICAL SAFETY PRECAUTIONS:
 Before connecting any leader cables, jumper cables, luminaires, or power equipment, always ensure that the power is turned off.

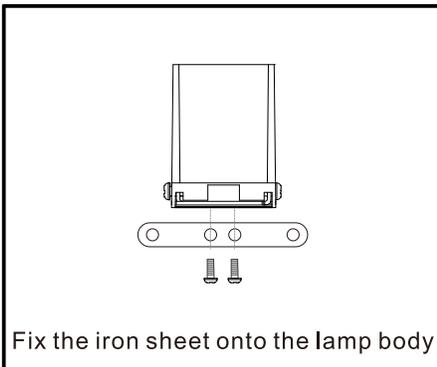

Disconnecting power before installation is critical to avoiding electrical shock, maintaining product integrity, and preventing other potential hazards. All Vals Lighting product installations and maintenance must be performed by qualified electricians. Ensure compliance with local electrical codes and standards.

Failure to follow the installation instructions provided in this guide may result in the warranty being voided for the products or system.
